# An uneven series

Synthetic source review. [1]

# Recorded balances cross zero [1]

| Year | Balance (units) |
|---|---|
| 2021 | -8 [1] |
| 2022 | 4 [1] |
| 2024 | 12 [1] |

Net balance in units. [1]

Three observations; no forecast or causal effect was established. [1][2]

# Sources

1. **Net balance training log** · Synthetic series table
   *“Synthetic net balances in units were -8 in 2021, 4 in 2022, and 12 in 2024. The year intervals are one year then two years. The records do not identify what caused the changes.”*
2. **Series interpretation note** · Synthetic scope note
   *“The three observations are not a forecast. A straight segment between recorded values does not establish an intermediate observation or a constant annual rate.”*
